Profile Summary

Final-year B.Tech CSE student with hands-on MERN Stack Application development with AI Integration, having built and deployed a secure REST API platform using Node.js(Express), React JS, MongoDB. Strong in OOPs and data structures, with 200+ problems solved on LeetCode/GeeksforGeeks.

Education

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore (SVVV, Indore) *Expected Graduation: June 2027*
B.Tech in Computer Science Engineering (CSE) CGPA: 8.4/10.0
Relevant Coursework: Operating System, DBMS, Computer Networks, Software Development Life Cycle, Artificial Intelligence

Projects

SVVV Campus Scout (GitHub) campusscout.svvv.edu.in

- Developed a full-stack web platform using React.js, Node.js (Express), and MongoDB to centralize academic resources for students and faculty which is Deployed on SVVV University Subdomain.
- Integrated AI-driven assistant for smart note summarization and context-based Q&A with ~90% accuracy.
- Designed and implemented a secure authentication and authorization system with JWT, bcrypt for role-based access.
- Created an Admin Panel for content verification, analytics, and managing uploads, users, and access control.
- Designed, integrated and tested 60+ RESTful APIs connecting frontend and backend systems, translating academic workflow requirements from students, faculty, and admin stakeholders into scalable technical solutions
- Managed application processes with PM2.
- Managed academic data for 4,000+ Users through centralized resource management.

Department of Posts Citizen Charter Monitoring System (GitHub) indianpost.vercel.app

- Developed a full-stack postal service monitoring platform with parcel tracking, complaint management, and KPI analytics.
- Built secure REST APIs using Spring Boot, Spring Security, JWT, and JPA.
- Designed responsive dashboards for citizens, postal staff, managers, and government officials using React.js and Tailwind CSS.
- Implemented role-based authentication, parcel workflow management, and branch-wise monitoring features.

Experience

Abhyudaya coding club – Developer Apr 2025 – Present

- Developed and maintained Express.js backend services, designing REST APIs and resolving issues through testing and code reviews.
- Tested API endpoints and backend workflows using Postman, validating request parameters, response data, authentication, error handling, and edge cases.

Technical Skills

Programming: Java, JavaScript
Frontend: React.js, Tailwind CSS, Material UI, Lucide React
Backend: Express.js, MongoDB, MySQL, Spring Boot, REST APIs
Testing: Postman and Thunder Client (API Testing)
Cloud/DevOps and Other Tools: Git, GitHub, AWS (EC2, S3, Lambda, Amplify)

Certifications & Achievements

- 200+ problems solved on LeetCode and GeeksforGeeks
- Programming in Java – NPTEL (Certificate Link).
- Data Base Management System - NPTEL (Certificate Link).
- The Joy of Computing using Python – NPTEL (Certificate Link).
- Java Full Stack Course – The Prime Step
